

Gravity Map of Wakayama District (Bouguer Anomalies), Gravity Map Series, no. 32

Gravity Map of Wakayama District (Bouguer Anomalies) in Gravity Map Series contains the existing gravity information and results of gravity surveys conducted by Geological Survey of Japan (GSJ), AIST.

GSJ has published the detailed Bouguer anomaly maps at a scale of 1:200,000 as Gravity Map Series in papers. The gravity maps copied in raster images are now available on the GSJ gravity database (https://gbank.gsj.jp/gravdb/index_En.php) via the Internet. GSJ publishes Gravity Map Series in digital files on the GSJ website to enhance the accessibility for users. Gravity Map Series in digital files provide users various visualizations such as layering and multi-colors, which was difficult through the previous form – papers. Newly measured gravity data are also published in digital files within the Gravity Map Series.

The Gravity Map of Wakayama District (Bouguer Anomalies) contains maps and documents listed below.

GSJ_MAP_GRAV_32_2017.pdf: 1:200,000 Gravity Map of Wakayama District (Bouguer Anomalies)

GSJ_MAP_GRAV_32_2017_D.pdf: Explanatory note of Gravity Map of Wakayama District (Bouguer Anomalies)

GSJ_MAP_GRAV_32_2017_A1.pdf: Appendix A: measured points maps in each organizations

GSJ_MAP_GRAV_32_2017_A2.pdf: Appendix B: newly measured gravity data

Readme_E.txt: This document

Data Format and System Requirements

The maps, explanatory notes and appendix data in PDF format can be browsed with Adobe Reader. Operating Systems: Windows and Macintosh platforms that are capable of running the application mentioned above properly.

Used Data Except Gravity Data

1:200,000 scale regional maps and fundamental geospatial data (10m grid elevation) issued by the Geospatial Information Authority of Japan with approval of the director general of Geographical Survey Institute (approval number: Hei 28 JOUSHI No. 1208).
