

## Contents

Preface	i-ii
Numerical simulation of the AD 869 Jogan tsunami in Ishinomaki and Sendai plains and Ukedo river-mouth lowland Yuichi Namegaya, Kenji Satake and Shigeru Yamaki	1-21
Coring and geoslicing in a lowland near Hotokehama, Tomioka Town, Fukushima, Japan Yuki Sawai	23-29
Ground penetrating radar profiling across the northern Ayasegawa fault in the Kanto-heiya-hokuseien (northwestern margin of the Kanto Plain) fault zone: detection of deformed shallow subsurface structure above a depth of 5 m Haruo Kimura, Haruo Horikawa and Ryosuke Ando	31-42
Measurements of crustal stress orientations around the north segment of the East Matsumoto Basin faults, central Japan, by using borehole deformation at shallow depths Tsutomu Kiguchi and Yasuto Kuwahara	43-64
Paleoseismicity of the Kanbayashigawa and Mitoke faults in northern Kyoto Prefecture, central Japan Toshikazu Yoshioka, Takashi Hosoya and Yuichi Mukainakano	65-80
Fault distribution and activity in the offshore extension of the Kikugawa fault system, western Japan Shintaro Abe, Ryoyu Arai and Yukinobu Okamura	81-118
Fault distribution and activity in the offshore extension of the Nishiyama fault system, western Japan Shintaro Abe, Ryoyu Arai and Yukinobu Okamura	119-148
Sonic Survey of the Unzen Fault Group in Shimabara and Tachibana Bays, central Kyushu Yuichi Sugiyama, Yukinobu Okamura, Nobukatsu Takeda and Kaoru Maruyama	149-194
