

CONTENTS

PART I

I.	Outline of the GH79-1 cruise	<i>Atsuyuki Mizuno, Keiji Handa, Yoshiro Masai, Teruki Miyazaki, Akira Nishimura, Koji Onodera, Kensaku Tamaki, Manabu Tanahashi, and Katsuya Tsurusaki</i>	1
II.	Positioning by NNSS and estimation of a bottom-hitting point of a freefall grab in the GH79-1 area	<i>Teruki Miyazaki</i>	32
III.	Bathymetry of the GH79-1 area	<i>Koji Onodera and Atsuyuki Mizuno</i>	45
IV.	Gravity anomalies in the GH79-1 area.....	<i>Teruki Miyazaki</i>	57
V.	Magnetic anomaly lineations in the northeastern margin of the Central Pacific Basin	<i>Kensaku Tamaki, Teruki Miyazaki, and Manabu Tanahashi</i>	71
VI.	Magnetic anomaly over seamounts near the central province of the Line Islands chain.....	<i>Teruki Miyazaki</i>	75
VII.	Seismic reflection survey in the northeastern margin of the Central Pacific Basin.....	<i>Kensaku Tamaki and Manabu Tanahashi</i>	77
VIII.	Substrate records by a 3.5 kHz subbottom profiler in the GH79-1 area	<i>Manabu Tanahashi, Kensaku Tamaki, and Atsuyuki Mizuno</i>	100
IX.	Seismic refraction records in the northeastern margin of the Central Pacific Basin.....	<i>Kensaku Tamaki and Manabu Tanahashi</i>	105
X.	Deep-sea sediments in the GH79-1 area: their geological properties	<i>Akira Nishimura</i>	110
XI.	Geotechnical properties of deep-sea sediments in the northern part of Central Pacific Basin, with a technical note on box core sampling	<i>Katsuya Tsurusaki and Keiji Handa</i>	143
XII.	Manganese nodules in the GH79-1 area: general descriptions	<i>Atsuyuki Mizuno, Kokichi Iizasa, Keiji Handa, Haruaki Tsuchiya, and Kenji Ishii</i>	162
XIII.	Manganese nodules: relationship between coverage and abundance in the northern part of Central Pacific Basin	<i>Keiji Handa and Katsuya Tsurusaki</i>	184

PART II

XIV.	Clay mineral distribution in sediment samples from the GH79-1 area in the Central Pacific Basin	<i>Saburo Aoki and Kaoru Oinuma</i>	218
XV.	Remanent magnetization of deep-sea sediments in the GH79-1 area	<i>Masato Joshima</i>	223
XVI.	Chemical composition of sediment cores from the GH79-1 area	<i>David Z. Piper</i>	229
XVII.	Major-element chemistry of bottom sediments from the GH79-1 area, the northern Central Pacific Basin	<i>Ryuichi Sugisaki</i>	236
XVIII.	Metal contents of manganese nodules from the GH79-1 area	<i>Tsunekazu Mochizuki, Shigeru Terashima, Atsuyuki Mizuno, and Seizo Nakao</i>	245
XIX.	Mineralogy of manganese nodules from the GH79-1 area	<i>Kokichi Iizasa</i>	257
XX.	Nodule growth rates in the GH79-1 area	<i>David Z. Piper and Christopher N. Gibson</i>	265
XXI.	Petrography of volcanic rocks from the GH79-1 area in the Central Pacific Basin	<i>Hidekazu Tokuyama and Atsuyuki Mizuno</i>	270
XXII.	Studies on silicate spherules from oceanic sediments in the GH79-1 area	<i>Hiroshi Nagasawa and Kazuo Yamakoshi</i>	274
XXIII.	Studies on metallic spherules from oceanic sediments in the GH79-1 area	<i>Kazuo Yamakoshi, Ken'ichi Nogami, and Okio Arai</i>	278
XXIV.	Regional and local variabilities of manganese nodules in the Central Pacific Basin	<i>Atsuyuki Mizuno</i>	281
