

CONTENTS

PART I

- I. The GH80-1 cruise: general remarks.....*Atsuyuki Mizuno, Seizo Nakao, Masato Joshima, Osamu Matsubayashi, Yoshihisa Okuda, Koji Onodera, Takayuki Saito, Katsuya Tsurusaki, and Akira Usui* 1
- II. Magnetic and gravity profiles of the Wake-Tahiti Transect, GH80-1 cruise*Masato Joshima and Yoshihisa Okuda* 36
- III. Seismic reflection profiles of the Wake-Tahiti Transect in the Central Pacific Ocean.....*Atsuyuki Mizuno and Yoshihisa Okuda* 46
- IV. Reconnaissance measurements of heat flow in the Central Pacific *Osamu Matsubayashi* 90
- V. Regional sedimentologic data: the Central Pacific Wake-Tahiti Transect, GH80-1 cruise*Seizo Nakao and Atsuyuki Mizuno* 95
- VI. Geotechnical properties of deep-sea sediment, Wake to Tahiti*Katsuya Tsurusaki and Takayuki Saito* 124
- VII. Variability of manganese nodule deposits: the Wake to Tahiti Transect*Akira Usui* 138
- VIII. Manganese nodules of the Wake-Tahiti Transect: a relationship between coverage and abundance*Takayuki Saito and Katsuya Tsurusaki* 224
- IX. Bottom potential temperature and vertical temperature profiles of near-bottom waters in the Central Pacific*Osamu Matsubayashi and Atsuyuki Mizuno* 231

PART II

- X. Micropaleontology of piston cores, Wake to Tahiti *Yokichi Takayanagi, Toyosaburo Sakai, Motoyoshi Oda, and Shiro Hasegawa* 238
- XI. Planktonic foraminiferal stratigraphy and a late Pliocene—early Pleistocene hiatus observed in core P164 from the Manihiki Plateau *Hiroshi Ujiie and Shoji Mishima* 264
- XII. Remanent magnetization of piston cores from the Wake-Tahiti Transect in the Central Pacific..... *Masato Joshima* 276
- XIII. Clay mineralogy of sediment cores from the Central Pacific Wake to Tahiti Transect—a preliminary report..... *Saburo Aoki* 288
- XIV. Major element chemistry of the sediments on the Central Pacific Transect, Wake to Tahiti, GH80-1 cruise *Ryuichi Sugisaki and Takashi Kinoshita* 293

XV.	Minor chemical composition of bottom sediments from the Central Pacific Wake-Tahiti Transect	<i>Naoki Mita, Seizo Nakao, and Komi Kato</i>	313
XVI.	Regional variation of manganese nodule chemistry from Wake to Tahiti, GH80-1 cruise	<i>Akira Usui and Tsunekazu Mochizuki</i>	338
XVII.	X-ray diffraction study of manganese nodules and associated rocks: the Wake to Tahiti Transect	<i>Akira Usui</i>	355
XVIII.	Manganese micronodules of the surface sediments from the Central Pacific Wake-Tahiti Transect	<i>Takayasu Uchio</i>	370
XIX.	Size dependence of siderophile element concentrations in black magnetic spherules of larger sizes in marine sediments from GH80-1 cruise.....	<i>Kazuo Yamakoshi</i>	382
