

## CONTENTS

I.	Outline of research cruises.....	<i>E. Honza and T. Miyazaki</i>	1
II.	Bottom topography at the junction of the Tohoku and the Ogasawara Arcs .....	<i>E. Honza, K. Onodera and K. Ishibashi</i>	20
<b><i>Southeastern offshore of the Boso Peninsula</i></b>			
III.	3.5 kHz subbottom profiling survey on the southeastern offshore of the Boso Peninsula .....	<i>F. Murakami and M. Tanahashi</i>	28
IV.	Gravity and geomagnetic surveys on the southeastern offshore of the Boso Peninsula .....	<i>K. Nishimura, F. Murakami and M. Tanahashi</i>	34
V.	Continuous seismic reflection profiling survey on the southeastern offshore of the Boso Peninsula .....	<i>M. Tanahashi and F. Murakami</i>	47
VI.	Bottom sampling and photographing on the southeastern offshore of the Boso Peninsula .....	<i>A. Nishimura</i>	54
VII.	Calcareous nannoplankton biostratigraphy off the Boso Peninsula .....	<i>S. Nishida</i>	67
VIII.	Recent bryozoans on the east offshore of the Boso Peninsula .....	<i>S. Arakawa</i>	74
IX.	Heat flow measurement on the east offshore of the Boso Peninsula .....	<i>M. Yamano, H. Fujisawa, H. Kinoshita, S. Honda and S. Uyeda</i>	78
<b><i>Kashima-Nada and Extensional Areas</i></b>			
X.	3.5 kHz subbottom profiling survey in Kashima-Nada area in Cruise GH 80-3 .....	<i>M. Tanahashi and Y. Okuda</i>	82
XI.	Gravity survey in Kashima-Nada area .....	<i>T. Miyazaki</i>	87
XII.	Continuous seismic profiling survey in Kashima-Nada, GH 80-3 cruise .....	<i>M. Tanahashi and Y. Okuda</i>	91
XIII.	Continuous seismic reflection profiling survey of Kashima No. 1 seamount and adjacent area .....	<i>Y. Okamura, K. Nakamura, M. Tanahashi and Y. Okuda</i>	103
XIV.	Continuous seismic profiling survey at the junction of the Tohoku and the Ogasawara Arcs in GH 80-3 cruise .....	<i>M. Tanahashi, Y. Okuda, Y. Okamura and K. Nakamura</i>	109
XV.	Cored and dredged material taken during the GH80-3 cruise from the offshore Kashima, area of the Kashima No. 1 and Katori Seamounts, and northern area of the Ogasawara Arc .....	<i>K. Nakamura, A. Nishimura and Y. Okuda</i>	112
